- Dr Tobias Pincock (Sydney)
- Dr Shahram Shahidi (Sydney)
- Dr Howard Webster (Melbourne)
- Dr Orhan Yelegin (Adelaide)
- Dr Michael Zacharia (Sydney)

CONVENOR'S LETTER

Dear Colleagues,

On behalf of the Australasian Academy of Facial Plastic Surgery I am honoured to invite you to attend our annual meeting on 14th-16th March 2013 in Perth, Western Australia. The Symposium will focus on instructional type of lectures, concise techniques, pearls and concepts, master class panels and interactive discussions. The Cadaver Dissection is fresh frozen and should provide more simulated and realistic operative experience. The majority of distinguished faculty will be available at the Dissection Course enable the Dissector and Non Dissector participants to personally gain invaluable technical skill and knowledge.

We are honoured to have International Keynote Guest Speakers Drs. Stephen Parks and Jonathan Sykes; Distinguished Plastic Surgeons Drs. Howard Webster and Peter Callan; and a host of AAFPS Faculty and International Facial Plastic Surgeons to share and exchanges their knowledge and experiences with us. We welcome Registrars, Residents, Fellows, Consultants and Specialists to attend this educational, interactive and exciting meeting.

The Objectives of the Meeting are:

1. Providing Fundamentals of Rhinoplasty, Facelift and Facial Rejuvenation Surgery including Profileplasty, Blepharoplasty and Otoplasty
2. Contemporary techniques and concepts
3. Concise videos presentations
4. Interactive panel discussions on finesse and complicated cases
5. Detailed instructional cadaver dissection for Dissectors and interactive observation for Non-Dissector Observers

The Conference will take place in three parts:

1. Symposium – presentations on Rhinoplasty and Facial Rejuvenation
Thursday 14 & Friday 15(AM) March
2. Cadaver Dissection – Facelift, Blepharoplasty/Otoplasty
Friday 15(PM) March
3. Cadaver Dissection – Rhinoplasty, Chin Augmentation or Facial Skin Flaps
Saturday 16 March

Perth in March is a great time of the year with all day clear sunshine and slightly warm nights, perfect for enjoying Western Australian drinks and cuisine in a contemporary setting with colleagues. In the West we are known for being laid back, however, we work hard and play even harder, so I hope you all will enjoy our hospitality.

Warmest regards

Tuan V. Pham FRACS
Convenor

A company you can take on

FACE VALUE

By providing innovative products for facial rejuvenation, Allergan delivers value to customers, and supports medical professionals in improving lives.

SPEAKER BIOGRAPHIES

Stephen Park
Keynote Speaker

Stephen S. Park, MD, FACS is board certified by the American Board of Facial Plastic and Reconstructive Surgery and is a diplomat of the American Board of Otolaryngology. Dr. Park completed Otolaryngology Head Neck Surgery Residency at Tufts University Medical Center, and fellowship training in Facial Plastic Surgery at the Oregon Health Sciences University, Portland, Oregon. Dr. Park joined the faculty at the University of Virginia Medical Center, USA in 1994 and currently is Professor, Vice-Chairman and Chief, Division of Facial Plastic and Reconstructive. He is widely recognized as an expert in the field of facial plastic surgery in particularly Rhinoplasty and Facial Skin Reconstruction, lecturing nationally and internationally on his surgical techniques and medical philosophy. Dr. Park's scientific research focuses on innovations in tissue-engineered cartilage using both animal and human chondrocytes. He has also published numerous books and chapters on different topics of facial plastic surgery. He is committed to the educational mission and has been invited to numerous Facial Plastic Meetings nationally and internationally. He serves on the board of directors for the American Academy of Facial Plastic and Reconstructive Surgery, for the American Board of Otolaryngology, and is vice-chair of the Residency Review Committee with the ACGME.

Jonathan Sykes
Keynote Speaker

Dr. Jonathan Sykes is a nationally recognized facial plastic surgeon and a highly respected educator who shares his expertise with surgeons around the world. Since beginning practice in 1983, Dr. Sykes has performed more than 18,000 aesthetic, functional and reconstructive surgeries on patients ranging from infants to the elderly. Since 1989, Dr. Sykes has been director of the Facial Plastic and Reconstructive Surgery Department of UC Davis Medical Center in Sacramento, California. He is a past president of the American Academy of Facial Plastic and Reconstructive Surgery and has published more than 150 professional articles and book chapters, and been editor of 7 textbooks. Dr. Sykes takes part in humanitarian medical work and has traveled to numerous countries to perform cleft and craniofacial surgeries.

George Marcells
AAFPS President

Dr Marcells is an ENT, Facial Plastic Surgeon based in Bondi Junction in Sydney. He is the President of the AAFPS (Australasian Academy of Facial Plastic Surgery). He is Co-Director of the Sydney Rhinology Fellowship which accepts Fellows for advanced rhinology training through the American Match program. Dr Marcells is Director of Bondi Junction Private Hospital and holds appointments as Visiting Medical Officer at Sydney Hospital and Prince of Wales Hospital. Dr Marcells is actively involved in Rhinology research and is currently Supervising an Honours Student Project on the External Nasal Valve.

Tuan Pham
Conference Convenor

Dr Tuan Pham, MBBS, FRACS, is a Fellow of the Royal Australasian College of Surgeons. He completed Otolaryngology Head & Neck Surgery fellowship in 2000 and a number of post-graduate Fellowships in Facial Plastic & Reconstructive Surgery, Head & Neck Surgery and Aesthetic Plastic Surgery 2001-2003. Currently he is in Private Practice, Medical Director of Perth Facial Plastic & Cosmetic Surgery and Churchill Day Surgery. He is also a Consultant Surgeon at Royal Perth Hospital in the Department of Otolaryngology Head Neck Surgery, a tertiary public hospital in Perth, Western Australia. Dr Pham practices a full scope of Facial Plastic & Reconstructive Surgery, Head & Neck Oncology Surgery and Aesthetic Surgery. His primary interest is Rhinoplasty, Facial Rejuvenation Surgery and Skin Cancer Surgery & Reconstruction of the Face & Neck. Dr Pham is currently the Secretary of the International Federation of Facial Plastic Surgery Societies (IFFPSS) and board member on the IFFPSS Executive Committee.

Attract more clients. Offer new treatments. Deliver the results that modern-day clients demand...

Uplifting Ultrasound - Non-Surgical Facelift That Delivers High Patient Satisfaction...

Ultherapy® is the first and ONLY technology with an FDA indication for non-invasive tissue lift. It uses micro-focused ultrasound to precisely heat tissue at multiple depths without affecting the surface of the skin. The result is a multi-dimensional lift that begins at the skin's foundation.

- Only one treatment required in most cases - high patient satisfaction
- Thirty to sixty minute procedure with high return on investment

Skin-Resurfacing With Combined Fractional Laser and RF. Includes Full Surgical Functions.

The versatile, high-performance fractional laser used by many Australian practitioners is now even better. The addition of simultaneous RF emission to fractional laser treatments reduces downtime and improves treatment outcomes.

- No consumables - full surgical and fractional laser functions in one system
- Now available in 40 watt, 60 watt or 80 watt systems
- Fractional resurfacing, acne scarring, wrinkle reduction and surgery

LASER • ULTRASOUND • HYDRAFACIAL COOLSCULPTING • IPL • AND MORE...

Call High Tech Laser on 1300 309 233 for all your aesthetic technology needs. Our expert team will help you identify the best-value system for you.

SPEAKER BIOGRAPHIES

Perry Burstin

Perry Burstin is a Melbourne based ENT Surgeon whose practice is based around functional, aesthetic and reconstructive septorhinoplasty. His other main medical interest is in third world health.

Benjamin Burt

Graduating from the University of Melbourne Faculty of Medicine in 1997, Dr Benjamin Burt went on to residence at the University of Adelaide and Oxford University Medical Schools.

He completed his Fellowship at UCLA School of Medicine in California, USA and received an academic appointment at Texas Tech University, where he recently returned from practicing in El Paso Texas.

He is affiliated with the American Academy of Ophthalmology, American Medical Association, American College of Surgeons and ASPPRS. He is a member of the American Academy of Ophthalmology, American College of Surgeons, and a Fellow of the Royal Australian and New Zealand College of Ophthalmologists.

Dr Burt now practices Oculoplastics in Canberra and Victoria

Peter Callan

As a fully qualified plastic surgeon since 1993, Mr Callan has achieved the highest standards in surgical training and has a wealth of experience. After completing plastic surgery training in Australia, he did further training in Scotland, England, Canada and the United States. His further training in these areas included skin cancer surgery, hand surgery, cosmetic surgery, craniofacial surgery and head and neck surgery. All surgery is performed by Mr Callan and he directs all aspects of Peter Callan Plastic Surgeon.

Mr Callan is a fellow of the Royal Australasian College of Surgeons, the only body which is authorised to recognise surgeons in Australia, and he is a member of the Australian Society of Plastic Surgeons, Australia's peak body in plastic and cosmetic surgery. He is a member of advisory boards to the AMA, the Federal Government and Allergan® Australia. Mr Callan is director of a private hospital in Melbourne and a lecturer for the Medical School of the University of Melbourne where he helps to train Australia's future plastic surgeons. He is also a director of Pamper Medical Skin Care Clinic in Geelong.

Gillian Dunlop

Dr Gillian Dunlop runs 2 parallel careers. As a surgeon she focuses on rhinoplasty, otoplasty and paediatric ENT. As an artist she has painted the portraits of all the Governors down the Eastern Seaboard including Her Excellency Quentin Bryce.

When is a filler not an injectable?

To look youthful, an aging face needs volume in the right places. This means envisioning your outcome, and then using appropriate skills and material to make it happen.

Frequently, however, a licensed clinician simply injects the patient with filler. The material is eventually absorbed – sometimes unevenly – and injections must be repeated.

However, with your surgical skills, you can give your patients a *permanent*, symmetrical solution that looks and feels more like natural bone structure. One that's an excellent foundation for face lifts or wrinkle removal.

Choose *Conform™* facial implants as the ideal midfacial filler, or select from assorted chin implants for an attractive jaw line. Your patients will enjoy the lasting aesthetics – your practice will enjoy the loyalty and referrals.

Benefit from your surgical edge.

SPEAKER BIOGRAPHIES

Stephen Floreani

Stephen Floreani is based in Adelaide, South Australia. Steve conducted a 12 month post-fellowship training in advanced sinonasal surgery in 2002, under Professor PJ Wormald in Adelaide. In 2003, he undertook an open structure rhinoplasty fellowship in the UK under Drs. Tim Leontsinis and Simon Watts. His clinical practice is currently focussed on sub-specialty interests in the fields of sinonasal / endoscopic skullbase and rhinoplasty surgery (functional and cosmetic). Dr. Floreani holds current appointments at the Royal Adelaide, Queen Elizabeth and Womens and Childrens Hospitals as a visiting medical specialist, being heavily involved with ENT registrar training in these hospitals as well as the SA regional chairman of registrar training. He is regularly an enthusiastic contributor on the faculty of local, national and international courses and meetings, teaching sinus/skullbase as well as rhinoplasty surgery.

Paul Gerarchi

Dr Gerarchi is an Australian trained specialist surgeon (FRACS), whose practice is dedicated to the functional, reconstructive and aesthetic surgery of the nose, face and eyes. Dr Gerarchi's advanced surgical training is extensive. After becoming a specialist surgeon in Australia, Dr Gerarchi continued to accumulate experience internationally with world leading Head, Neck and Plastic Surgeons, acquiring the most progressive surgical techniques and completing five advanced surgical 'fellowships'. Additionally, Dr Gerarchi is one of only a handful of surgeons in Australia who is Board Exam Certified with the American Academy of Facial Plastic Surgery. Dr Gerarchi regularly lectures at seminars, courses and conferences, both nationally and internationally.

Richard Harvey

During training in otolaryngology (Ear Nose & Throat Surgery), Richard identified a growing need to provide more specialised care for those people with nose, sinus, allergy, and skull base conditions. Much of the medical field had subspecialised allowing some doctors to provide their patients with a greater knowledge and care in particular fields that was not offered by standard training alone. Few doctors, however, had travelled abroad to gain a greater knowledge of rhinology/endoscopic surgery (nose, sinus, allergy and skull base). Sydney is fortunate to have specialists in ears, voice, and head & neck surgery. Richard is the only dual fellowship trained rhinologist in Australia. As one of the two US trained Rhinologists in Sydney (specialists in nose, sinus, allergy, skull base and endoscopic surgery), Richard hopes to bring the research, knowledge and clinical skills from his time working in the UK, Sao Paulo and the US to Sydney ENT Clinic. Additionally, he has an active academic and research program with St Vincent's Hospital, the University of New South Wales, and Macquarie University, which allows continued collaboration with international groups and ensures that we remain on the forefront of new technologies, treatments options, and techniques.

Cary Kailis

Dr Kailis graduated from UWA medical school in 1977. He completed his fellowship in surgery in 1985. After extensive postgraduate training in the USA and UK, he established private practice in West Perth and also is the director of Bodyworx Cosmetic Surgery. His work involves mostly cosmetic breast surgery, facial rejuvenation and Rhinoplasty. He is a keen aviator and oversees Kailis Wines, an established Margaret River appellation.

SPEAKER BIOGRAPHIES

Stephen Kleid

Stephen Kleid is best known as a Head & Neck surgeon. Inspired by his mothers' disastrous Rhinoplasty in the 1960's, his interest was piqued to achieve a natural looking Rhinoplasty.

As a Registrar he completed a Head & Neck Surgical Fellowship in Florida, groomed for his current position in charge at the Peter MacCallum Cancer Centre in Melbourne.

He also runs a busy Private Practice, doing Sino-Nasal surgery, Rhinoplasty, and Snoring Surgery.

Stephen Lo

Currently adjunct assistant professor, National University of Singapore Medical School, and Chief of Facial Plastic Surgery Service, Department of Otorhinolaryngology, Tan Tock Seng Hospital. He undertook his otorhinolaryngology-head & neck surgery training in London, having obtained a Doctorate of Medicine degree in rhinology research, followed by the prestigious one year European Academy of Facial Plastic Surgery fellowship. Main clinical interest includes all aspects of aesthetic and functional facial plastic surgery, facial rejuvenation surgery, and rhinoplasty. Committee and teaching faculty of more than 40 academic bodies, courses and conferences. Associate Program Director and facial plastic module lead of the Singapore National Healthcare Group ENT residency training program. Director of Pan Asia Academy of Facial Plastic & Reconstructive Surgery. Committee member of ASEAN Academy of Facial Plastic & Reconstructive Surgery. Author of over 120 publications and 230 scientific paper presentations.

William Mooney

Dr William Mooney is a fully qualified Ear, Nose and Throat and Head and Neck Oncology Surgeon. He attended Monash Medical School in Victoria where he was the winner of the final year Medical and Surgical prizes. General surgical training followed at the Alfred Hospital in Melbourne and in the United Kingdom before completing Ear, Nose and Throat and Head and Neck surgical training in the New South Wales program.

Dr Mooney became a fellow of the Royal Australasian College of Surgeons in 2000. After completing this surgical training Dr Mooney travelled widely to further his expertise. He attended formal training fellowships in head and neck oncology surgery and rhinology in London at the Royal National Throat, Nose and Ear Hospital and the facial plastic and cosmetic fellowships with the Australasian Academy of Facial Plastic Surgeons. He has attended visiting fellowships in head and neck surgery at Memorial Sloan-Kettering Cancer Centre in New York, in voice and laryngology with Jean Abitol in Paris and in further facial cosmetic surgery at the Lasky Clinic in Los Angeles.

Jayson Oates

Dr Jayson Oates FRACS is the Medical Director of the Academy Facial Plastics & Laser Specialist clinic. He completed his Bachelor of Medicine and Bachelor of Surgery in 1990 and went on to train in Otolaryngology Head and Neck Surgery (Fellow of the Royal Australasian College of Surgeons FRACS) finishing in 1997. Interested in facial plastic surgery he joined The Australasian Academy of Facial Plastic Surgery in 1995 and the European Academy of Facial Plastic Surgery in 1997. In 1998 and 1999 he continued his training by gaining further experience in facial plastic surgery in the United Kingdom and the United States of America. In 2005 Dr Oates was elected President of the Australasian Academy of Facial Plastic Surgery.

SPEAKER BIOGRAPHIES

Tobias Pincock

Dr. Pincock is a highly trained specialist in plastic and cosmetic surgery of the face, head and neck practicing in the greater Sydney Area. His training has included facial cosmetic surgery, facial reconstructive surgery, and craniofacial trauma reconstruction. His sub-specialisation in plastic surgery of the face, head and neck allows him to concentrate on delivering the most up-to-date surgical and non-surgical techniques to his patients.

Dr. Pincock is one of the few Surgeons in Australia to undergo formal Facial Plastic and Reconstructive Surgical training in the United States. This training consisted of a formal fellowship with the University of Washington under the guidance of Wayne F. Larrabee, M.D. F.A.C.S, who was one of the founders of the American Academy of Facial Plastic and Reconstructive surgery and is a world renowned expert in Ageing face and Rhinoplasty surgery.

Shahram Shahidi

Dr Shahidi FRACS is an Australian qualified and board-certified Facial Plastic and Ear, Nose and Throat Specialist Surgeon. His primary interest and area of expertise is Rhinoplasty Surgery. Dr Shahidi treats all aspects of nasal and sinus pathology and disease.

On completion of his medical and research degree from the University of Sydney he commenced his internship and basic surgical training at Royal Prince Alfred Hospital in Sydney. On completion of his second year of advanced general surgical training he started training in the Otorhinolaryngology/Head & Neck Surgery programme. After a further 4 years of intensive study he completed his Fellowship of the College of Surgeons.

He studied further and completed the Fellowship of Australasian Academy of Facial Plastic Surgery in Sydney. Dr Shahidi then went to the USA where he completed two mini fellowships in facial plastic surgery in Oregon and Indianapolis; this was followed by attendance at the workshop in Rhinoplasty surgery in Chicago. He then went to the UK and became the Clinical Fellow in Rhinology and Rhinoplasty surgery based at Charing Cross Hospital in London and also at Royal United Hospital in Bath. Both positions demanded an expert working knowledge of surgical techniques and their application to nasal, sinus anatomy and pathology.

Howard Webster

Mr Howard Webster is a specialist plastic surgeon at ARC Plastic Surgery. He consults in Melbourne, and regularly in Shepparton. With over 18 years experience in private practice, he focuses primarily on body, breast, face & nose, cosmetic and reconstructive surgery. Howard trained in Melbourne and Brisbane, and subsequently spent three post graduate years overseas training in the UK and the USA.

Howard is a past president of the Australian Society of Plastic Surgeons – the peak Australian professional body for plastic surgeons. He served for nine years on the ASPS Council. Howard was the founding Chairman of the new Australasian Plastic Surgery Education and Research Foundation, is an honorary senior lecturer in Surgery with the Melbourne University Rural Clinical School, and over the years has co-authored five chapters in plastic surgery texts. He has presented at many national and international plastic surgery meetings, and was on the teaching faculty for the IPRAS World Congress in Plastic Surgery in Vancouver, 2011. Howard is the Scientific Convenor on the Organising Committee for the Plastics Surgery Congress 2013.

Orhan Yelegin

Dr Orhan Yelegin is a dual qualified Maxillofacial surgeon and Facial cosmetic surgeon working in Private Practice at his new surgical suite [Leading Face Surgery] in Adelaide, South Australia. After graduating from Dentistry at Melbourne University in 1993, Dr Yelegin received a Fellowship (FDSRCS) in Oral Maxillofacial Surgery with the Royal College of Surgeons of England in 1996. After a three-year surgical stint working in UK hospitals, he returned to Australia in 1999 where he trained in busy oral and maxillofacial units in Adelaide and Darwin. In 2003, he completed a Bachelor of Medicine and Bachelor of Surgery at the University of Adelaide. Dr Yelegin received a fellowship (FRACDS) in Oral and Maxillofacial Surgery with the Royal Australasian College of Dental Surgeons in December 2006.

Cosmetic training involved training in the USA [Florida] and Australia [Perth] and culminated with a cosmetic fellowship from the AAFPS [2009, Perth WA]. Mentors for the fellowship were Dr Jayson Oates/Dr Tuan Pham/Dr Carey Kalis.

Face&Body Treatments

Syneron and Candela are the global leaders in the aesthetic medical device marketplace.

Syneron and Candela deliver world-class support with global reach. Our comprehensive service and clinical expertise are there for you every step of the way.

Syneron and Candela offer a wide range of solutions that cover a vast array of the most in demand applications:

- Sublime skin tightening
- Sublative fractional rejuvenation
- Multimode CO2
- Gentle permanent hair reduction
- Pigment and tattoo removal
- UltraShape permanent fat destruction
- VelaShape body contouring
- Next generation multi-platform technology

GentleMax Pro® Integrated Aesthetic Treatment System

The GentleMax Pro offers more power and versatility than any other multi-wavelength device. It is a single consolidated system that delivers a range of treatments - all skin type hair removal, as well as pigmented and vascular lesions.

SPEAKER BIOGRAPHIES

Michael Zacharia

Dr Michael Zacharia (MBBS, FRACS, FAAFPS, FACCS) is a specialist Ear, Nose and Throat and Facial Plastic surgeon, known for his experience in facial rejuvenation. He uses a combination of medical and surgical techniques to achieve the best results for his patients.

Dr Zacharia qualified in Medicine at Adelaide University (MBBS) in 1987 and subsequently completed his advanced training in ENT Surgery. He received his Fellowship with the Royal Australasian College of Surgeons (FRACS) in 1996 as a specialist surgeon qualified to perform ENT surgery and Head and Neck surgery. During this period Dr Zacharia performed over 200 rhinoplasty surgery procedures.

Following his graduation in 1996 Dr Zacharia was offered the position of locum Clinical Lecturer in Otolaryngology for the Medical Science Division of the University of Oxford. In 1997 he completed a six-month fellowship with the well-known Beverly Hills plastic surgeon, Dr Harry Glassman. This furthered Dr Zacharia's knowledge in various aspects of cosmetic surgery of the face and body.

Dr Zacharia is a former President of the Australasian College of Cosmetic Surgery (ACCS). The College is a multi-disciplinary body consisting of General Surgeons, Plastic Surgeons, Dermatologists, Ear Nose and Throat surgeons (ENT Surgery), Ophthalmologists and other specialist practitioners.

with emphasis on **Rhinoplasty** and **Facial Rejuvenation**

PROGRAM - DAY 1

**14th
March**

RHINOPLASTY & PROFILEPLASTY:
Fundamentals to Master Symposium

Techniques & Pearls: continued

- 13:00-13:10 Dorsal augmentation - alloplastic
13:10-13:20 Dorsal augmentation - autologous
13:20-13:30 Grafts in rhinoplasty: Use of septal, conchal and costal cartilage
13:30-13:40 Functional consideration in contemporary rhinoplasty
13:40-13:50 Nasal valve management in rhinoplasty
13:50-14:00 ALar-Columellar Disproportion: Diagnosis and Management
14:00-14:10 Managing minefield in primary rhinoplasty

14:10-14:30 Afternoon Tea

Advanced Rhinoplasty - Master Class

- 14:30-14:45 Complex tip: lower lateral cartilage modifications
14:45-15:00 Complex tip: lateral crural turned in flap, Lateral crura repositioning
15:00-15:15 Managing a short nose
15:15-15:30 Managing a tension / long nose
15:30-15:45 Profileplasty: Chin Advancement / Reduction Genioplasty
15:45-16:00 Profileplasty: Chin Augmentation- Alloplastic

Panels: The Critical Points

- 16:00-16:30 **Panel: Finesse of Rhinoplasty**
3 Rhinoplasty Blasts from each speaker.

5 mins presentations from each speaker.
Open for Q&A 5 minutes.

- 16:30-17:00 **Panel: Managing Complications and Revision Rhinoplasty: psychological, functional and aesthetic**
Case Study - 5 minutes presentation from each speaker for Q&A 5 minutes.
- Managing difficult patient
- Managing dorsal collapse post septorhinoplasty
- Post septorhinoplasty nasal obstruction / nasal valve collapse
- Managing skin complications post septorhinoplasty – thin skin, thick skin
- Managing wide or narrow ala base

COMPANY PROFILES

The AAFPS would like to thank the following sponsors who have generously given their support

Allergan is a global, technology-driven, multi-specialty health care company pursuing therapeutic advances to help patients live life to their fullest potential.

Founded in 1950 and headquartered in Irvine, California, Allergan Inc is a pharmaceutical, biologics and medical devices company.

Allergan Australia Pty Ltd was first established in Sydney in 1968. The Australian affiliate is amongst the Top Ten Allergan affiliates globally, and employs more than 140 employees across Australia and New Zealand. Our product offerings focus on the areas of Neurosciences, Eye Care, Medical Aesthetics, and Health (Obesity).

Avant is a leading provider of medical indemnity insurance with a presence throughout Australia.

As a mutual organisation, Avant and its predecessors have been part of the Australian medical defence market for over a century. Today, we look after the needs of over 57,000 health care practitioners and students, and because we have no shareholders we can reinvest our profits to provide you with new and better services.

We provide health care practitioners and students with a range of products and services. We give you a wealth of expertise in claims management, access to a risk advisory service and access to experienced medico-legal advisors when you need them. We offer ongoing support during the life of your career – we're with you all the way.

The Doctors' Health Fund is a registered private health insurer which serves the Australian medical community since it was established in 1977.

The Fund offers a service that protects members from the impact of health care incidents in their lives. It provides convenience and flexibility with a choice of hospital and extras cover.

Our Top Cover for hospital offers the best gap cover in Australia. It delivers unrestricted choice of doctor and greater benefits which are based on the AMA List of Medical Services and Fees.

The Doctors' Health Fund is a signatory to the Private Health Insurance Code of Conduct.

Syneron Candela are the largest manufacturer of laser, light and RF based technology in the world today with more than 25,000 practitioners using their equipment, 10 million treatments performed with their products each year and, 700 scientific papers published to date.

The inventors of IPL and ELOS technology, as well as the gold standard in hair removal, GentleLASE, now offer you the benefits of a much larger and innovation driven company. The new elase with Motif, elos Plus and GentleMAX Pro System for laser rejuvenation and hair removal offers you even faster treatment times with variable pulse widths and it's very, very quiet.

The new UltraShapeV3 Body Contouring System is our most powerful system with Focused Ultrasound Technology yet delivering faster treatment times and easy to use for proven instant, selective and permanent fat cell destruction. Come visit us and see these new advances in Skin Rejuvenation, Body Contouring and Laser Hair removal. The wide range of lasers and ELOS systems offers your clinic efficient growth and client satisfaction with the fastest treatment speeds available.

You can be confident with all of the Syneron Candela range with the superior after-sales and clinical support to be there when you need it with a national network of sales, training and service staff.

VOROTEK

experience. knowledge. performance

Founded in 1971 by Australian ENT surgeon Dr John Vorrath, Vorotek has been developing and producing fully integrated optical systems and lighting systems for over forty years.

In 1971 Dr. Vorrath developed the original Voroscope and was the co-developer of the LumiView in 1993.

His aim has always been to provide users with products that greatly enhance their capability for examination, instrumentation and procedures. Now over 95% of Australian ENT surgeons use the Vorotek O Scope.

COMPANY PROFILES

Equipment Sponsors

The Integrated Power Console's design was inspired by feedback from you, the surgeons and nurses in the field.

Our IPC® system powers the most expansive range of handpieces, with the widest variety of powered surgical procedure-specific blades, burs and saws. Fully integrated with Endo-Scrub™ for enhanced visualisation at the surgical site and a trackable blade interface with Fusion™, the Medtronic ENT navigation system, the IPC® offers power and more.

For further information, please contact your local Medtronic ENT representative. You can also learn more at www.medtronic.com.au

Since its beginnings in 1945, KARL STORZ has established itself worldwide as an international and highly regarded company in the production and sale of medical instruments and devices. The exciting addition of KARL STORZ Endoscopy Australia Pty Ltd means that the Australian healthcare market will experience service, education and support in line with the level of excellence provided by the global KARL STORZ Corporation. Surgeons, nurses and end users will enjoy a level of expertise and excellence that can only come from the support gained by a direct link to the parent company in Germany. KARL STORZ Australia is here to service and educate the market to the highest possible standards.

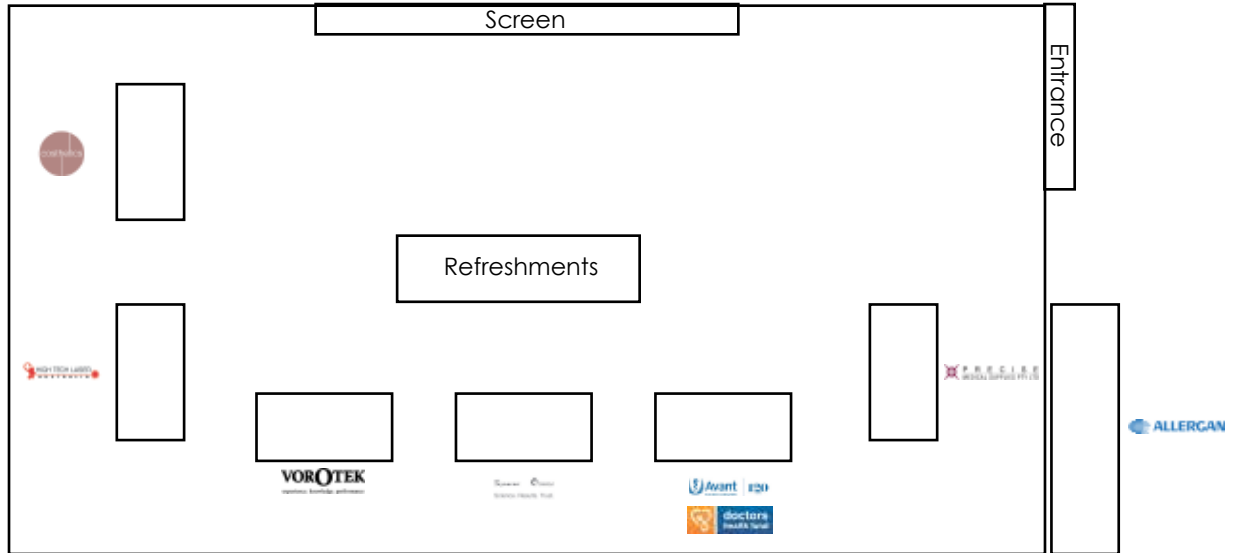

Stryker is one of the world's leading medical technology companies and is dedicated to helping healthcare professionals perform their jobs more efficiently while enhancing patient care. The Company offers a diverse array of innovative medical technologies to help people lead more active and more satisfying lives.

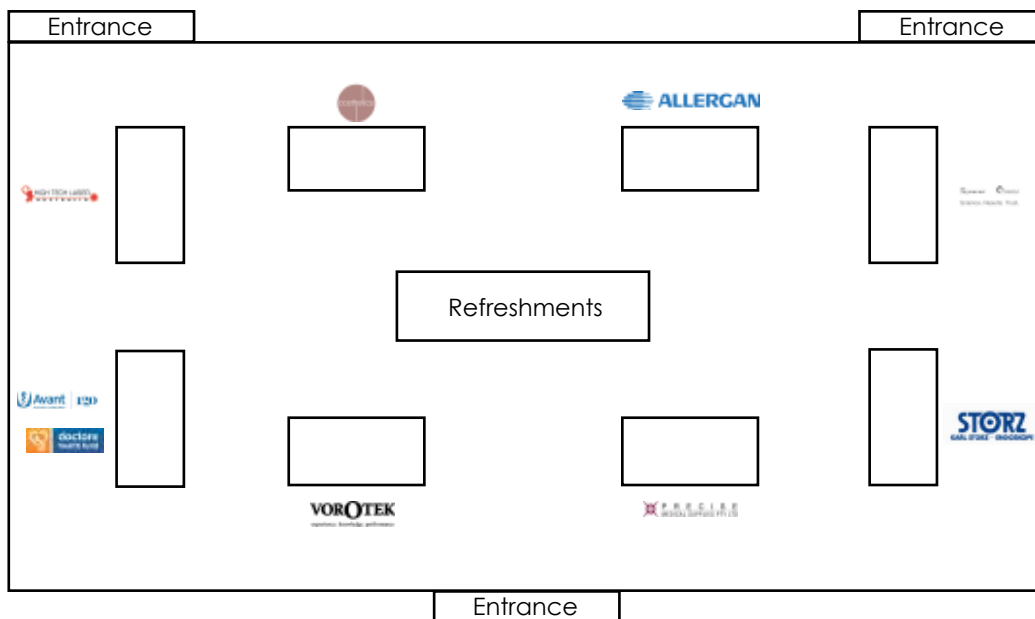

Through close collaboration with leading surgeons worldwide, Stryker Craniomaxillofacial has gained a well-earned reputation as a market leader for its innovative developments in Craniomaxillofacial and Neurosurgery. In order to maintain this spirit of innovation and leadership, we continuously focus our research and development of biomaterials, fixation systems and radio frequency.
